

Eamon Duede

University of Chicago
Chicago, IL 60637

Email: eduede@uchicago.edu
Homepage: <http://www.eamonduede.com>

Education

Ph.D. Philosophy & Ph.D. History and Philosophy of Science, *University of Chicago*, 2017 - 2023 (expected)
Department of Philosophy & Committee on Conceptual and Historical Studies of Science, (Joint Ph.D.)

Fellow, AI-enabled Molecular Engineering of Materials and Systems for Sustainability,
Pritzker School of Molecular Engineering, University of Chicago, 2021 - Present

M.A. Humanities (Philosophy), *University of Chicago*, 2008 - 2011

B.A. Philosophy (with honors), *Loyola University Chicago*, 2003 - 2007

Research Areas

Specialization: Artificial Intelligence & Machine Learning | Trust & Trustworthy AI | Philosophy of Science

Competence: Logic | Epistemology | History of Science | Sociology of Science

Peer Reviewed Journal Articles

Eamon Duede. "Instruments, Agents, & Artificial Intelligence: Novel Epistemic Categories of Reliability"
Synthese (Forthcoming)

Dissertation

Title: Epistemics of AI-Infused Science

Committee: Kevin Davey (Chair), Tom Pashby, James A. Evans, Ian Foster

Abstract: My dissertation is about epistemic trust in Artificial Intelligence in scientific contexts. In it, I offer novel interventions in the budding epistemology of AI for science. While the use of AI has helped scientists overcome the complexity of historically intractable scientific problems, it has recently become clear that the use of current AI systems in science is met with a number of epistemological and social challenges. These challenges undermine scientists’ ability to trust in the

reliability of AI. Yet, very little philosophical work has been done to articulate the fundamental nature of these challenges, let alone specify what plausible and satisfying solutions might look like. The four core papers of this dissertation aim at just that, and seek collectively to A) broaden and deepen our understanding of the unified and interrelated nature of the challenges for scientific trust in AI, B) propose solutions, and C) articulate what this all means for the opportunities and benefits that AI has to offer science and society.

Other Employment

Special Advisor, *Knowledge Lab*, University of Chicago, 2017 - Present

Founder, *Philosophic Ai*, 2015 - Present
